To: Blood-Stream Infection (CDC)
Subject: Suggested changes to proposed guidelines for prevention of catheter-related infections
Attachments: Letter to CDC on Guidelines for IV devices.doc

To whom it concerns;

I have attached a edited version of an email I mailed earlier tonight. The earlier version was sent in haste without editing in an attempt to meet the midnight deadline. This revised version corrects some of the more blatant but simple errors in the earlier version. Please accept this revision instead of the previous version to decrease reader confusion.

Thank you for your attention to this matter.

Sincerely,
Guy D. LaRue
